

# *Developmental Delays, Autism, and Behavioral Learning Conference*

## **Everything You Ever Wanted to Know About Autism**

**September 27, 2018**

**8:30 - 3:30 PM**

**Riley's Conference Center  
446 Seitz Drive, Fort Riley, KS**

**8:30-9:00 AM**

**Welcome and Registration**

**9:00-1200 PM**

**Everything You Ever Wanted to Know About Autism**

**Keynote presenter: Cari Ebert, M.S., CCC-SLP**

Parents and professionals must work together to identify the most effective strategies for supporting children with autism, which can be a challenge at times. This seminar is designed to increase the learner's understanding of this complex neurobehavioral disorder.

**12:00-12:45 PM**

**Lunch (available for purchase at Riley's Conference Center)**

**12:45-2:00 PM**

**The "I" stands for Individualized!**

**Leia Holley, Family Health and Resource Specialist**

This interactive session will provide an overview of the IEP (Individualized Education Program) process for students receiving special education services. Parents will leave the session with information and strategies that will help them be active partners and participants of their child's IEP team.

**2:00-2:45 PM**

**Kansas Special Health Care Needs Program**

**Kayzy Bigler, KS-SHCN Program Manager**

The Kansas Special Health Care Needs (KS-SHCN) Program has undergone many significant changes over the last few years to better address the needs of the special health care needs population in Kansas. This presentation will share with you, the programs four core components and the five priorities to help you understand the scope and depth of work the program is doing to meet the needs of individuals with special health care needs in the state. Participants will also learn how the program directly links to other Special Health Service Programs, eligibility guidelines and how individuals can apply to receive services from the KS- SHCN program.

**2:45-3:30PM**

**BAL-A-VIS-X - Earl Robinson, LSCSW**

Bal-A-Vis-X enables the whole mind-body system to experience the symmetrical flow of a pendulum by using mid-line crossings, and steady rhythmic movements. These exercises can be increasing complex or simplified for those with special needs.

### **Questions and answers**
